List of Contents

NUMBER 1

T. Florkowski, L. Morawska and **K. Rozanski**	1	Natural production of radionuclides in geological formations
A. Demény, K. M. Dede and **L. Vas**	15	A pulsed method for measuring thermal diffusion parameters of non-moderating media
C. G. Clayton and **R. Spackman**	25	Prospects for accelerator neutron sources for large volume minerals analysis
P. Eisler, M. Borsaru, S. F. Youl and **J. Charbucinski**	43	Quantitative spectrometric borehole logging techniques for coal mining
B. D. Sowerby, M. J. Millen and **P. T. Rafter**	55	Fast-neutron and gamma-ray transmission technique for the on-line determination of moisture in coal and coke
C. I. Sánchez-Angulo and **M. García-León**	69	A method for the measurement of ^{137}Cs and ^{99}Tc from the same rainwater sample
Announcement	i	

NUMBER 2

Editorial	III	Robert Maxwell and Pergamon Press: a tribute
H. Polach, G. Calf, D. Harkness, A. Hogg, L. Kaihola and **S. Robertson**	75	Performance of new technology liquid scintillation counters for ^{14}C dating
W. R. Mills, L. S. Allen and **D. C. Stromswold**	81	Pulsed neutron porosity logging based on epithermal neutron die-away
C. W. Tittle	95	Prediction of compensated neutron response using neutron macroparameters
P. Lysne	105	Neutronic properties of Mesaverde sands—I. Calibration of the advanced reactivity measurement facility
P. Lysne	113	Neutronic properties of Mesaverde sands—II. Results
C. M. Gordon and **C. W. Peters**	123	Instrumental assay of kerogen in shale using fast neutrons

G. Kennedy — 129 Interference from uranium fission in the determination of lanthanum by neutron activation

S. S. Raghuwanshi and B. K. Bhaumik — 133 The application of a multiple regression model for aero radiometric data

NUMBER 3

J. Charbucinski, P. L. Eisler and M. Borsaru — 137 Quantitative nuclear borehole logging based on neutron excited gamma-reactions

F. E. Senftle and J. L. Mikesell — 151 Borehole capture gamma-ray spectrometry in very dry rock

T. Gozani — 163 Advances in bulk elemental analysis using neutron interactions

C. W. Tittle and M. D. Glascock — 171 Analysis of boron, samarium and gadolinium in rock samples by neutron capture gamma-ray spectrometry

J. S. Schweitzer, D. V. Ellis, J. A. Grau and R. C. Hertzog — 175 Elemental concentrations from gamma-ray spectroscopy logs

K. Verghese, R. P. Gardner, M. Mickael, C. M. Shyu and T. He — 183 The Monte Carlo-library least squares analysis principle for borehole nuclear well logging elemental analyzers

J.-L. Pinault — 191 Nuclear quantitative analysis of P, Si, Ca, Mg, Fe and Al in boreholes in a phosphate mine

NUMBER 4

M. Borsaru, J. Charbucinski, P. Huppert, S. Youl and P. Eisler — 201 Coal ash determination in dry boreholes by the neutron capture technique

M. J. Millen, P. T. Rafter and B. D. Sowerby — 207 On-line determination of moisture in coke on conveyor belts

D. C. McKeon and H. D. Scott — 215 SNUPAR—a nuclear parameter code for nuclear geophysics applications

W. Michaelis and A. Prange — 231 Trace analysis of geological and environmental samples by total-reflection x-ray fluorescence spectrometry

F. E. Senftle, J. Mikesell, C. T. Merritt, L. R. Stieff and C. B. Stieff — 247 Calculation of the number of alpha-track stars in loaded nuclear emulsions

N. P. Singh, S. Singh and H. S. Virk — 263 A fission track technique used for hydrogeochemical prospecting in northern India

H. K. Sharma, G. S. Lodha, K. J. S. Sawhney, B. S. Grewal, V. K. Mittal and H. S. Sahota — 269 The impact of lagoons on ground water quality

B. Gabańska and E. Krynicka-Drozdowicz — 273 The effective thermal neutron absorption cross-section of a heterogeneous mixture

Corrigenda — 277
